CORVETTE Z06

Shown above: starting at \$52,235*

THE QUICKEST CORVETTE YET.

Z06 stormed onto the scene two years ago, and enthusiasts still can't get enough of this radical Corvette. 405 horsepower. Zero-to-60 in under four seconds. Lateral acceleration of 1 g. And a top speed that has exceeded over 170 mph on a test track.

Starting with its fixed-roof hardtop body, Z06 is a complete performance package: a unique 405-horsepower LS6 V8 engine and six-speed manual transmission. A specifically tuned chassis and lightweight titanium exhaust components. An interior with custom touches. An exterior that will be noticed. And a storied nameplate destined to be identified in the years to come as an extremely significant Corvette.
